SUMMARY

I am a junior full-stack developer with a background in performance marketing and data analysis, transitioning to software engineering to build data-driven digital products. Leveraging experience in SQL, APIs, and automation, I bring a user-centric, objective-oriented approach to development that is focused on metrics like retention and engagement to drive user value. Through my existing projects, I have honed skills in Python, JavaScript and full-stack frameworks. Currently pursuing a M.Sc. in Computer Science, I'm eager to apply an analytical mindset to dev teams, turning user insights into scalable solutions.

TECH SKILLS

Programming: Python, SQL, JavaScript, HTML, CSS

Frameworks: React, Redux, Node.js, Fast API

Tools: Git, Docker, PostgreSQL, Tableau, Google Analytics, Google Tag Manager

Languages: English (native), Ukrainian (native)

PROJECTS

Foodies (full-stack, group project) - <https://github.com/AndriyBabiy/foodies-fe>, <https://asaulyak.github.io/foodies-fe/>

- Node.js, Express, React, Redux, PostgreSQL
- Worked as part of a team in developing front-end and back-end components of a recipe full-stack web app.

TestRevisionRAG - <https://github.com/AndriyBabiy/TestRevisionRAG-GoogleGenAI>

- Python, GoogleGENAI package, ChromaDB
- Created a Retrieval Augmented Generation Model that takes in past papers from the SAT preparation exams and allows students to query the LLM model on finding questions related to topics in that paper.

Churn Classification of Customers - https://github.com/AndriyBabiy/goit_mlf_final_project

- Conducted EDA and Performed Transformations of an anonymized dataset for Telecommunications Company.
- Using XGBoost classification I managed to effectively classify 87% of the churning customers.

PROFESSIONAL EXPERIENCE

Welltech

Warsaw, Poland

Marketing Data Analyst

March 2024 –
July 2024

- Using SQL and Tableau, I worked on conducting EDA analysis and creating dashboards that were then used in the daily activities of the SMM team and the TikTok marketing teams.
- I worked with the Facebook and Instagram Graph APIs, GitLab and the Data Engineering team to set up scripts that automated data processes for data tables in Tableau.

Atlas Primer

Dublin, Ireland

Chief Marketing Officer

December 2021 – July
2023

- Using data and A/B testing I redesigned and developed the new landing page via WIX.
- I implemented an in-app events system that facilitated real-time user interaction monitoring, which improved week 1 retention by 4x in top cohorts.
- I built a daily performance dashboards in Amplitude and Google Analytics 4 which identified areas of user drop-off and eliminated bugs within the app, increasing user weekly engagement by 200%.

2K Games

Dublin, Ireland

Performance Marketing Analyst

July 2020 – December
2021

- I monitored and updated the daily data pipelines for the marketing dashboards. I was also part of the team that designed and introduced a new naming convention tool.
- I conducted SQL analyses to outline specific email campaigns that influenced open rates and user conversion, providing key insights to refine CRM marketing strategies and audience identification.

EDUCATION

GoIT Neoversity, Woolf

Expected July 2026

M.Sc. in Computer Science

- Core stream: Software Engineering with elective modules in Data Science and Machine Learning

Trinity College Dublin

Dublin, Ireland

B.S. in Business and Economics majoring in Entrepreneurship, Marketing and Management

July 2020

- Grade: First Class Honors (1.1)

LEADERSHIP AND COMMUNITY INVOLVEMENT

Stanford Code in Place

April 2025 –

Section Leader

May 2025

- Led a group of 10-15 students through weekly meetings to help them learn the fundamentals of Python.
