

Andriy Babiy

Full-Stack Software Engineer

Dublin, Ireland, +353863099721, me@andriybabiy.com

<https://www.linkedin.com/in/andriy-babiy>, <https://github.com/AndriyBabiy>

SUMMARY

Full-stack software engineer building production applications with Python, TypeScript, and cloud infrastructure (AWS). Experienced in API integrations, real-time systems, and AI/ML pipelines. Background in data analysis and product development brings a user-centric, metrics-driven approach to engineering, focusing on retention, engagement, and scalable solutions. Currently completing an M.Sc. in Computer Science.

TECH SKILLS

Programming: Python, TypeScript, SQL, JavaScript, HTML, CSS

Frameworks: React, Next.js, Redux, Node.js, Express, FastAPI, Socket.IO, LangChain

Tools: Git, Docker, AWS (EC2, RDS, S3, CloudFront, ALB), PostgreSQL, CI/CD

Languages: English (native), Ukrainian (native)

PROJECTS

Website Security Scanner - https://github.com/AndriyBabiy/non-artificial_ai-security

- Next.js, FastAPI, Docker, LangChain, GPT-4
- Built a 3-tier security scanner (Next.js + FastAPI + MCP Server) with LLM-orchestrated vulnerability detection, SSL validation, and security header analysis.

Interactive Video Platform (hackathon) - https://github.com/AndriyBabiy/hackathon_video

- TypeScript real-time voting app with React, Express, and Socket.IO WebSockets enabling audiences to control branching video narratives via QR-code sessions.

Multi-Agent Website Cloner - <https://github.com/AndriyBabiy/giveago-multiagent>

- Python multi-agent pipeline using LangGraph and Playwright to scrape, evaluate, and optimize website clones with automated quality feedback loops

PROFESSIONAL EXPERIENCE

BeyondBmi

Associate Prototype Developer

- Managed the development function of the organisation in continuing the development and bug fixing needs to facilitate the Customer Support and Sales team.
- Maintained the Full-Stack webapp that included the documentation, bug reproduction, testing, and deployment.

Dublin, Ireland

September 2025 –

Current

Studyie (study.ie)

Founder & Full-Stack Engineer

- Building an EdTech platform gamifying Leaving Cert maths revision with tree-based visualization. Full-stack: Next.js, TypeScript, Node.js, Clerk auth.

Dublin, Ireland

Active 2025 – Present

Founded 2017

Welltech

Data Analyst / Integration Engineer

- Built SQL-driven analytics dashboards and conducted EDA to support daily decision-making across marketing teams.
- Integrated Facebook and Instagram Graph APIs with GitLab CI pipelines and the Data Engineering team, automating data ingestion for Tableau dashboards.

Warsaw, Poland

March 2024 –

July 2024

Atlas Primer

CMO / Growth Lead

- Designed, A/B tested, and shipped a new landing page, driving measurable improvements in user conversion.
- Built a real-time event tracking system using Amplitude that improved W1 retention 4x in top user cohorts.

(Remote)

December 2021 – July

2023

EDUCATION

GoIT Neoversity, Woolf

M.Sc. in Computer Science

- Core stream: Software Engineering with elective modules in Data Science and Machine Learning

Expected July 2026

Trinity College Dublin

B.S. in Business and Economics majoring in Entrepreneurship, Marketing and Management

Dublin, Ireland

July 2020

LEADERSHIP AND COMMUNITY INVOLVEMENT

Stanford Code in Place

Section Leader

- Led a group of 10-15 students in weekly meetings to help them learn the fundamentals of Computer Science through Python.

April 2025 –

May 2025
